

NATIONAL INSTITUTE OF TECHNOLOGY KURUKSHETRA
THEORY EXAMINATION

End Semester Examination

Roll No. 125.11.1044

Month and year of examination: **Aug 2026**

Program: **B.Tech.**

Subject: **Engineering Practice**

Semester: **2nd Sem**

Course Code: **MEIC-102/MEIC-11**

Maximum Marks: **50**

Time Allowed: **3 hours**

Session (M): **09:30 AM-12:30 PM**

- *Unless stated otherwise, the abbreviations/symbols have their usual meaning in context of the subject.*
 - *Diagrams should be well labeled and drawn properly using the drawing instruments.*
 - *Attempt all the parts of a question at one place maintaining their sequence.*
 - *Be precise and don't provide unnecessary information that has not been asked.*
-

Q1. With a neat, labelled sketch, illustrate the various parts of a sand mold used in casting and explain the importance of the sprue, runner, riser, and choke in the gating system. [5+5]

Q2. Define wood seasoning with different methods of wood seasoning along with the benefits of wood seasoning. [5+5]

Q3. What are the key objectives of legal frameworks for industrial safety, and how do they contribute to worker well-being and the efficient functioning of industrial operations? [10]

Q4. Differentiate between DCSP and DCRP in metal arc welding. Which method is preferred for joining thin metal plates and why? or [4+6]

Draw a neat and well-labelled diagram of an Oxy-Acetylene welding setup.
Explain the working principle of the Oxy-Acetylene gas welding process.

Q5. (a) Explain the different types of feed mechanisms used in a lathe machine. [8]
Describe the working of any two mechanisms with suitable sketches.

(b) What are the various types of punches used in a fitting shop differentiate with their specific applications? [1+1]
