

ELECTRICAL ENGINEERING DEPARTMENT

MID TERM I

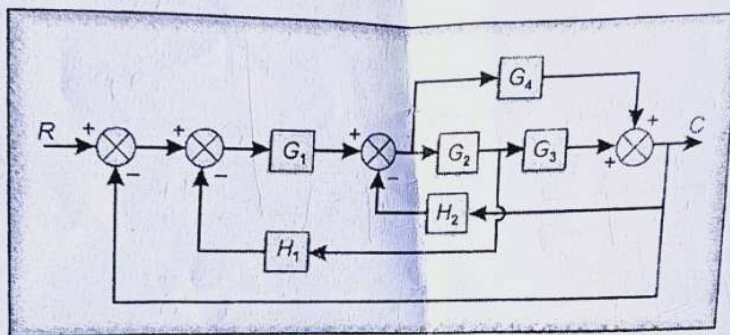

B.Tech 4th Sem

CS (RAPC-28)

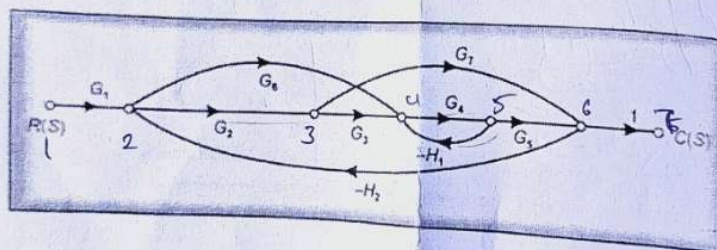

MM: 15

Attempt All Questions.

1. Obtain the transfer function for the block diagram by using reduction rules. (5)

2. Obtain the closed-loop transfer function $\frac{C(s)}{R(s)}$ by using Mason's gain formula. (5)

3. (a) Explain & model a pneumatic system. (2)

(b) Define sensitivity. Compare the sensitivity of open loop & closed loop control system with respect to forward gain.

(3)
